MAKAN

SERVICES GUIDE | FRONT ROYAL, VIRGINIA

# Front Royal’s local IT department for small business

You get friendly day-to-day support, with a cybersecurity specialist’s eye on keeping you safe. Your computers, email, Wi-Fi, and backups are looked after — so you can get on with running your business.

> **No minimum — start with 1 device.**
> You pay per device, not per person. If you have one computer, you pay for one device. If your shop has 2 PCs shared by 15 people, you pay for 2 devices — not 15.

## Who Makan is for

You will feel at home with Makan if you rely on computers, email, and the internet, but you do not have an IT department of your own — whether you work alone or lead a team of 30.

**Solopreneurs & very small businesses**
You still need reliable backup, security, and someone to call when something breaks.

**Auto shops & trades with shared PCs**
A few shared computers used by a larger crew — per-device billing keeps your cost fair.

**Professional offices**
Law, real estate, accounting, and insurance offices handling sensitive client files and email.

**Medical & dental practices**
You need reliable systems, careful access control, and backups you can trust.

**Retail, hospitality & Main Street**
Your point of sale, Wi-Fi, and email simply need to work, every day.

**Home services, churches & nonprofits**
Crews in the field, small offices, and volunteer teams who need simple, secure, affordable setups.

# What Makan does for you, day to day

Everything below is written in plain language, because you should know exactly what you are paying for. Security runs through all of it — it is part of the job, not an extra.

### 1. Help desk & on-site support

You get remote help for everyday problems — email, printers, software, slow computers — plus on-site visits when hands-on work is needed.

### 2. Monitoring & patching

Your computers are watched for failures and kept up to date with security patches, so small issues are fixed before they stop your work. Automated monitoring runs 24/7.

### 3. Email & office software admin

Your Microsoft 365, Google Workspace, or Zoho accounts are set up and managed for you — accounts, passwords, new hires and departures, shared mailboxes, and spam settings.

### 4. Networking, Wi-Fi & firewall

You get business-grade routers, firewalls, and Wi-Fi that cover your whole building — with a separate, safe guest network for customers and visitors.

### 5. Backup & recovery

Your files and Microsoft 365 / Google data are backed up automatically and tested, so they can actually be restored after a deletion, a failure, or a ransomware attack.

### 6. Cybersecurity

You get multi-factor authentication (MFA), endpoint protection, email security, sensible password practices, and vulnerability scanning — so gaps are found and closed before someone else finds them.

### 7. New hire & office setup

Your new hire has a computer ready on day one, and your new office is set up end to end: internet, network, email, printers, and phones.

### 8. IT planning & vendor help

You get straight advice on what to buy and when to replace aging equipment, plus help dealing with internet, phone, and software vendors so you do not have to.

> **How you get help:** You contact Makan, most problems are resolved remotely, and if hands-on work is needed, your on-site visit is booked by appointment. Every job is logged, so the same problem does not keep coming back unnoticed.

# Monthly packages, priced per device

**No minimum — start with 1 device.** A **device** is a managed workstation, laptop, or server with the Makan management agent installed. People who share a device do not add cost.

| Included | Essentials | Professional | Complete |
|---|---|---|---|
| **Price per device / month** | **$85** | **$135** | **$185** |
| Monitoring & patch management | **Included** | **Included** | **Included** |
| Managed antivirus / endpoint protection | **Included** | **Included** | **Included** |
| Remote help desk | **Included** | **Included** | **Included** |
| Microsoft 365 / Google / Zoho admin | **Included** | **Included** | **Included** |
| On-site visits | Billed hourly | **Included*** | **Included*** |
| Backup — files + Microsoft 365 / Google | Add-on | **Included** | **Included** |
| MFA setup & email security tuning | Add-on | **Included** | **Included** |
| Quarterly vulnerability scan + report | — | Add-on | **Included** |
| Annual IT plan & budget review | — | **Included** | **Included** |
| Priority response + after-hours coverage | — | — | **Included** |

## What you pay in practice

### Essentials

**$85** / device / mo

The basics covered, and someone to call.

- 1 device: **$85/mo**
- 10 devices: **$850/mo**

MOST POPULAR

### Professional

**$135** / device / mo

Adds backup, on-site coverage, and security basics.

- 2 devices: **$270/mo**
- 10 devices: **$1,350/mo**

### Complete

**$185** / device / mo

Adds quarterly scanning and priority coverage.

- 10 devices: **$1,850/mo**
- 20 devices: **$3,700/mo**

**Why per-device is fairer — your auto shop example:** If your shop has **2 PCs and 15 mechanics** sharing them, you pay for 2 devices: 2 x $135 = **$270/month** on Professional — not a bill based on 15 people. A **solopreneur with 1 device** on Essentials pays **$85/month**.

* On-site coverage is fair use, within the service area on page 5, by appointment. Hardware, licenses, and project work are billed separately.

# Just need one-time help? No monthly plan required.

Plenty of businesses just need something fixed, set up, or checked — once. You pay only for the help you use: **no contract, no monthly plan, and no obligation to continue.**

NO PLAN NEEDED

### Break-fix support — pay only for the fix

**$125** / hour — remote
Most problems are fixed remotely, without a visit.

**$135** / hour — on-site
Hands-on help at your location, by appointment.

1-hour minimum, then billed in 30-minute steps. You approve the work before it starts — and there is nothing to sign up for afterward.

## How one-time help works

**1. Contact Makan**
Call or email Jake: **(571) 469-7365** · **Jake@makanusa.com** · **Makanusa.com** and describe the problem in plain words — no tech knowledge needed.

**2. Get it looked at**
Your problem is checked remotely first. If hands-on work is needed, an on-site visit is booked by appointment.

**3. Pay for the time used**
You pay for the fix at the rates above. That is the end of it — unless you decide you want more help.

### Tech & Security Checkup — $499 flat

A complete one-time health check for up to 10 devices — patching, antivirus, MFA, backup, firewall, and email security, plus a light vulnerability scan.

You receive a written report with prioritized fixes. The full $499 is credited toward your first managed month if you sign within 30 days — or simply keep it as a standalone service, no strings attached.

### Prepaid block hours — help on tap, still no plan

The middle option if you want help available without a monthly plan:

- **10 hours: $1,150** ($115/hr)
- **20 hours: $2,200** ($110/hr)

Use your hours for support or small projects. Valid for 12 months.

## One-time projects — priced in writing before work begins

- **New workstation setup:** from $250 per workstation, plus hardware at cost.
- **Microsoft 365 / Google / Zoho migration:** from $499 for up to 5 mailboxes, then $75 per extra mailbox.
- **Network / Wi-Fi refresh:** from $750 labor for a small office, plus hardware.
- **Full vulnerability assessment:** quoted per scope, based on the size and complexity of your systems.

**Not sure what you need?** Start with a **Free Discovery Visit** (a 30-minute call plus a short on-site look) — call or email Jake: **(571) 469-7365** · **Jake@makanusa.com** · **Makanusa.com** — a plain-English summary of what to fix first, with no obligation. If you later want ongoing coverage, the monthly packages on page 3 are there whenever you are ready — no pressure, either way.

# Add-ons, getting started, and where Makan works

| Add-on | Price | Notes |
|---|---|---|
| Backup for Essentials clients | $15 / device / mo | Files + Microsoft 365 / Google backup |
| Additional managed device | At your tier rate | Billed at your plan rate per device |
| Quarterly vulnerability scan | $299 / quarter | Included in Complete |
| Security awareness training | $10 / device / mo | Phishing tests + short staff training |
| After-hours / weekend coverage | $150 / mo flat | Per business, for business-critical issues only |
| New workstation setup | $250 one-time | Plus hardware at cost |

### Getting started takes 1–2 weeks

Your network is documented, monitoring and protection are installed, MFA and backup are turned on, and you receive a simple “how to get help” sheet. You can start with 1 device and add devices as you grow.

### Your service area

**Front Royal & the valley**
Front Royal and Warren County, plus Winchester, Strasburg, and Woodstock.

**East toward Manassas**
Warrenton and Fauquier County, Gainesville, Haymarket, Bristow, and Manassas.

**By appointment — contact for availability:** (571) 469-7365 · Jake@makanusa.com · Makanusa.com. Automated monitoring of your devices runs 24/7. Travel beyond the areas above is agreed with you in writing first, and remote support is available to you on the same terms wherever you are based.

### Terms, in plain English

- You can choose a 12-month term at the prices in this guide, or month-to-month at +10%.
- Your packages cover monitoring, support, and management as listed on page 3, and do not include a 24/7 staffed monitoring center.
- Hardware and software licenses are billed separately, and compliance certification is not included — though Makan can help you work toward it.
